

Angle of attack

Hitting “down” on the ball is what makes the ball go up. Whenever the ball is on the ground you want to hit with a descending angle. When the ball is on a tee, you are still trying to hit down on the ball with the exception of the driver, fairway woods and long irons. The tee is an advantage, its why you only get to use it on the first shot of every hole.

Teeing height for a tee shot.
