

# Traditional Ball Position

Ball position is very important. A perfect swing with the ball in the wrong place won't go as good as a decent swing with the ball in the right place.

Notice as the clubs get longer the ball is placed closer to the lead foot. Nothing is played towards the rear foot in a full swing when you want the ball to go high. ( Note: If you are trying to play the ball low, that is when you may play the ball a little towards the rear foot. For example, keeping the

ball low on a windy day or to go underneath trees. )

## The constant ball position.

The ball is always in the same place.
