

Golf Swing Fundamentals.

There are 5 things that are going to happen in the golf swing. Two of them are club face angle and swing path. The pictures below are the 9 ways a swing can happen, depending on what happens with the face and the path will dictate what shot you get. This is important to know for cause and effect so you know what you should try and correct to hit it straighter or to make it curve, because sometimes you want to curve it left or right. The other 3 are speed, angle of attack, and centeredness of hit.

Black - Club Face Red - Club Path
